Coffee: World Markets and Trade

Colombia's Diminished Production Continues

Colombia's 2011/12 coffee production is lowered 2.0 million bags from the June forecast and is equal to last year's downwardly revised 8.5 million bags. October 2011 production, the first month of the marketing year, was significantly below normal. Production over the last several years has been plagued by heavy rains, coffee rust and the coffee cherry borer. These negative factors have persisted longer than anticipated. Colombia accounts for about 10 percent of world production. Brazil and Vietnam's production estimates are unchanged from the June forecast and together account for over 50 percent of the total.

Revised 2011/12 Forecast Overview

Production

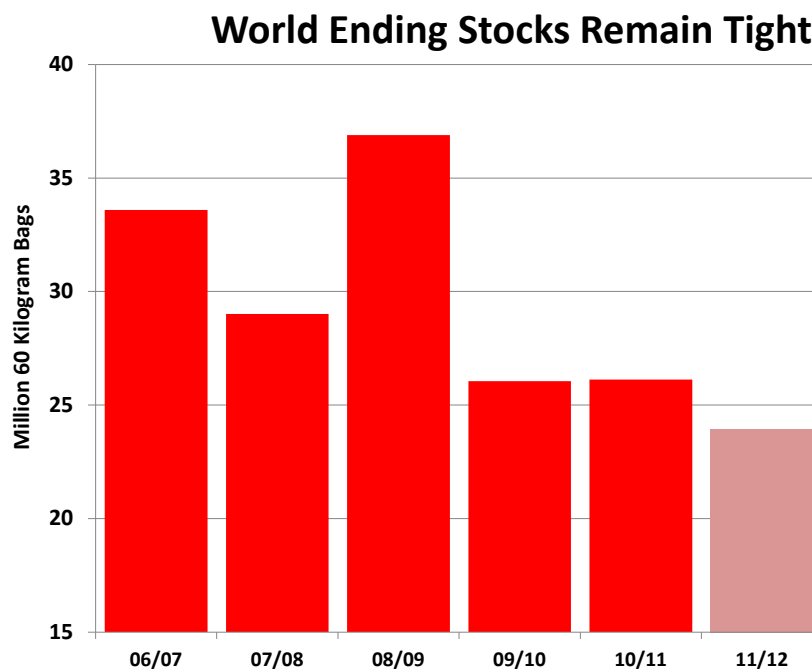

World coffee production is revised down from the June estimate by 1.2 million bags to 133.8 million bags (60 kilograms).

- Colombia is reduced 2.0 million bags to 8.5 million as shortfalls continue due to heavy rains, coffee rust and the coffee cherry borer.
- Brazil and Vietnam are unchanged at 49.2 million bags and 20.6 million bags, respectively.
- Mexico is raised 600,000 bags to 4.3 million on higher yields from renovated trees as well as a recovery in the State of Puebla following cold temperatures during the previous season's bloom.

Ending Stocks

World green coffee bean ending stocks are reduced 2.4 million bags to 24.0 million and remain tight.

- Brazil is lowered 1.6 million bags to 3.4 million following an upward revision to exports.
- EU-27 is reduced 500,000 bags to 11.5 million on the expectation of weaker imports.

Exports

World green coffee bean exports are raised 500,000 bags to 91.2 million (trade figures exclude roast and soluble coffee).

- Brazil is raised 1.0 million bags to 25.9 million due in part to stronger than anticipated exports to the United States and Japan.
- Indonesia is revised up 600,000 bags to 5.8 million following larger available supplies and increased shipments to Japan and Russia.
- Colombia is reduced 1.5 million bags to 7.5 million on sharply reduced exportable supplies.

Approved by the World Agricultural Outlook Board/USDA

Imports

World green coffee bean imports are raised 700,000 bags to 90.8 million primarily on upward revisions to a number of producing countries.

- Indonesia is revised up 400,000 bags to 600,000 to meet domestic demand.
- Colombia is raised 240,000 bags to 800,000 to account for lower production.
- India is up 250,000 bags to 750,000 with the expectation of solid demand.
- Switzerland is increased 300,000 bags to 2.3 million on steady growth.

Revised 2010/11

Production

World coffee production is revised down from the June estimate by 1.5 million bags to 136.4 million bags.

- Colombia is reduced 1.0 million bags to 8.5 million as the second crop significantly underperformed the main crop.
- Cote d'Ivoire is lowered 500,000 bags to 1.6 million on difficulties related to its recent supply chain disruptions caused in part by recent political turmoil.

Ending Stocks

World green coffee bean ending stocks are lowered 700,000 bags to 26.1 million.

- Brazil is reduced 900,000 bags to 2.9 million on stronger than anticipated exports.
- Japan is raised 300,000 bags to 2.6 million on a build-up primarily from Central America.

Exports

World green coffee bean exports are raised 500,000 bags to 96.5 million.

- Brazil is revised up 1.2 million bags to 31.8 million on stronger shipments to Europe.
- India is 900,000 bags higher to 3.7 million on gains for Europe.
- Colombia is lowered 1.0 million bags to 7.4 million on lower exportable supplies.

A conversion factor of 2.6 was used to convert soluble coffee to the green bean equivalent.

Coffee marketing year for producer countries begins either in October (Colombia), April (Indonesia) or July (Brazil), as examples.

Coffee marketing year for non-producer countries begins in October.

For the United States, Canada and the EU-27, exports appear as zero in the database and the actual amount has been subtracted from imports to show net imports.

Coffee marketing year for producer countries begins either in October (Colombia), April (Indonesia) or July (Brazil), as examples.

Coffee marketing year for non-producer countries begins in October.

For the United States, Canada and the EU-27, exports appear as zero in the database and the actual amount has been subtracted from imports to show net imports.
